DINESH KUMAR KOMALAGUNTA NAGESWARA RAO

Software Developer

Nellore, India | 9550991693 | dineshkomalagunta@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in Data Structures & Algorithms, object-oriented programming, and databases, building backend services, REST APIs, and full-stack applications with ASP.NET Core, Node.js, and React. Hands-on experience with IoT/BMS systems and MQTT migration at Cognizant, plus AI/GenAI project work using LLMs and RAG as an added strength.

EXPERIENCE

Cognizant **November 2025 – Present**

Program Analyst Trainee | IoT SUS CoE | Client: Amazon

- Delivered the migration of client sites from the Niagara Fox protocol to MQTT-based communication, moving device and point data onto a lightweight publish/subscribe messaging model.
- Validated data flow between JACE controllers and the Supervisor after migration, confirming devices continued reporting accurately across the new MQTT communication path.
- Resolved device connectivity and data discrepancies to restore reliable site monitoring following the protocol change.
- Delivered ASP.NET Core backend services and REST APIs for a C# IoT monitoring project, enabling device data collection and storing telemetry in databases to support monitoring and reporting.

PROJECTS

InterviewAI **July 2026 – October 2026**

AI-Powered Interview Preparation Platform

- Delivered an AI-powered platform that turns a candidate's resume into personalized technical, behavioral, and coding interview questions using LLMs.
- Enabled realistic interview practice through real-time text and voice mock interviews with LLM-based answer evaluation, dynamic follow-up questions, and automated feedback.
- Gave users actionable preparation insights through ATS resume analysis, skill-gap detection, interview readiness scoring, and personalized learning roadmaps.
- Secured user access with authentication and surfaced progress through interview analytics dashboards in a responsive, SaaS-style interface.

PowerPulse **November 2025**

Energy Management System | React, ASP.NET Core Web API, SQL Server, Entity Framework Core, Recharts

- Delivered a full-stack energy monitoring system giving teams visibility into meter-level and line-level power consumption with daily, weekly, and monthly analytics.
- Enabled secure, role-appropriate access for Admins, Managers, and Employees using JWT authentication and role-based access control on ASP.NET Core REST APIs built with Entity Framework Core and a repository/service pattern.
- Automated detection of abnormal energy usage with scheduled background services that apply configurable threshold rules and generate alerts.
- Enabled live and historical consumption analysis through interactive Recharts dashboards.

EDUCATION

SRK Institute of Technology **April 2025**

B.Tech – Electronics and Communication Engineering | CGPA: 7.2/10

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, C#
Backend	ASP.NET Core, Node.js, Express.js, REST APIs, Kafka
Frontend	React.js, HTML, CSS, Tailwind CSS
Databases	SQL Server, PostgreSQL, MongoDB, SQL
AI / GenAI	LLMs, Generative AI, RAG, LangChain, Machine Learning
Cloud & Tools	GCP, Git, Docker, Entity Framework Core, Unit Testing
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

CERTIFICATIONS & ACHIEVEMENTS

- **Claude Certified Developer - Foundations** (Anthropic, Sep 2026) — building applications with Claude and the Anthropic API.
- **Build with Gemini** (Google Cloud, Sep 2026) — Intermediate AI skill badge.
- Solved **800+** Data Structures & Algorithms problems across LeetCode and GeeksforGeeks.
